

Want to buy inline skates for adult?

1

Rest your foot on a perfectly flat, rigid surface on which you have placed a piece of white paper. Holding your foot still in this position, make two marks on the piece of paper: one at the end of your heel and another at the tip of your longest toe. Now measure the distance in mm between the two marks and you will have your Mondo Point size.

2

Read the conversion chart, select your size and complete your purchase successfully!
